CBPA Features

-  Roads
-  Streams
-  RPA / RMA Boundaries

2 0 2 4 Miles

A scale bar showing distances in miles, with markings at 2, 0, 2, and 4 miles.

November 17, 2001

Figure 4 - 14

Input data sources are VDOT and USDA SSURGO data sets (1997). The SSURGO soil mapping is produced at a scale range of 1:15,840 to 1:24,000. Enlargement of output maps greater than original production can lead to misinterpretation of the data. The depiction of this data does not eliminate the need for onsite sampling, testing, and detailed study of specific sites for intensive uses. Original input data sources should be checked periodically for latest updates.
