Subject: Pictures

Craig, please include these pictures in your reports to the board. one is the original, "Anderson Mill" home, the miller lived here with his family, sisters families, and attended to the mill. The more updated picture is what it is today, maintaining its original integrity and our good stewardship of Anderson Mill.

The final attachment is a picture of the Finchums home from across the river (our view). Please note that the trees are bare as this was taken in January 2019 during the coldest days. The picture does not show the scope of the grade (approximately 15' high or more) that it would take number one to cross the river, then climb up the steep grade.

While I've you here is there anything new/additional we should be aware of?

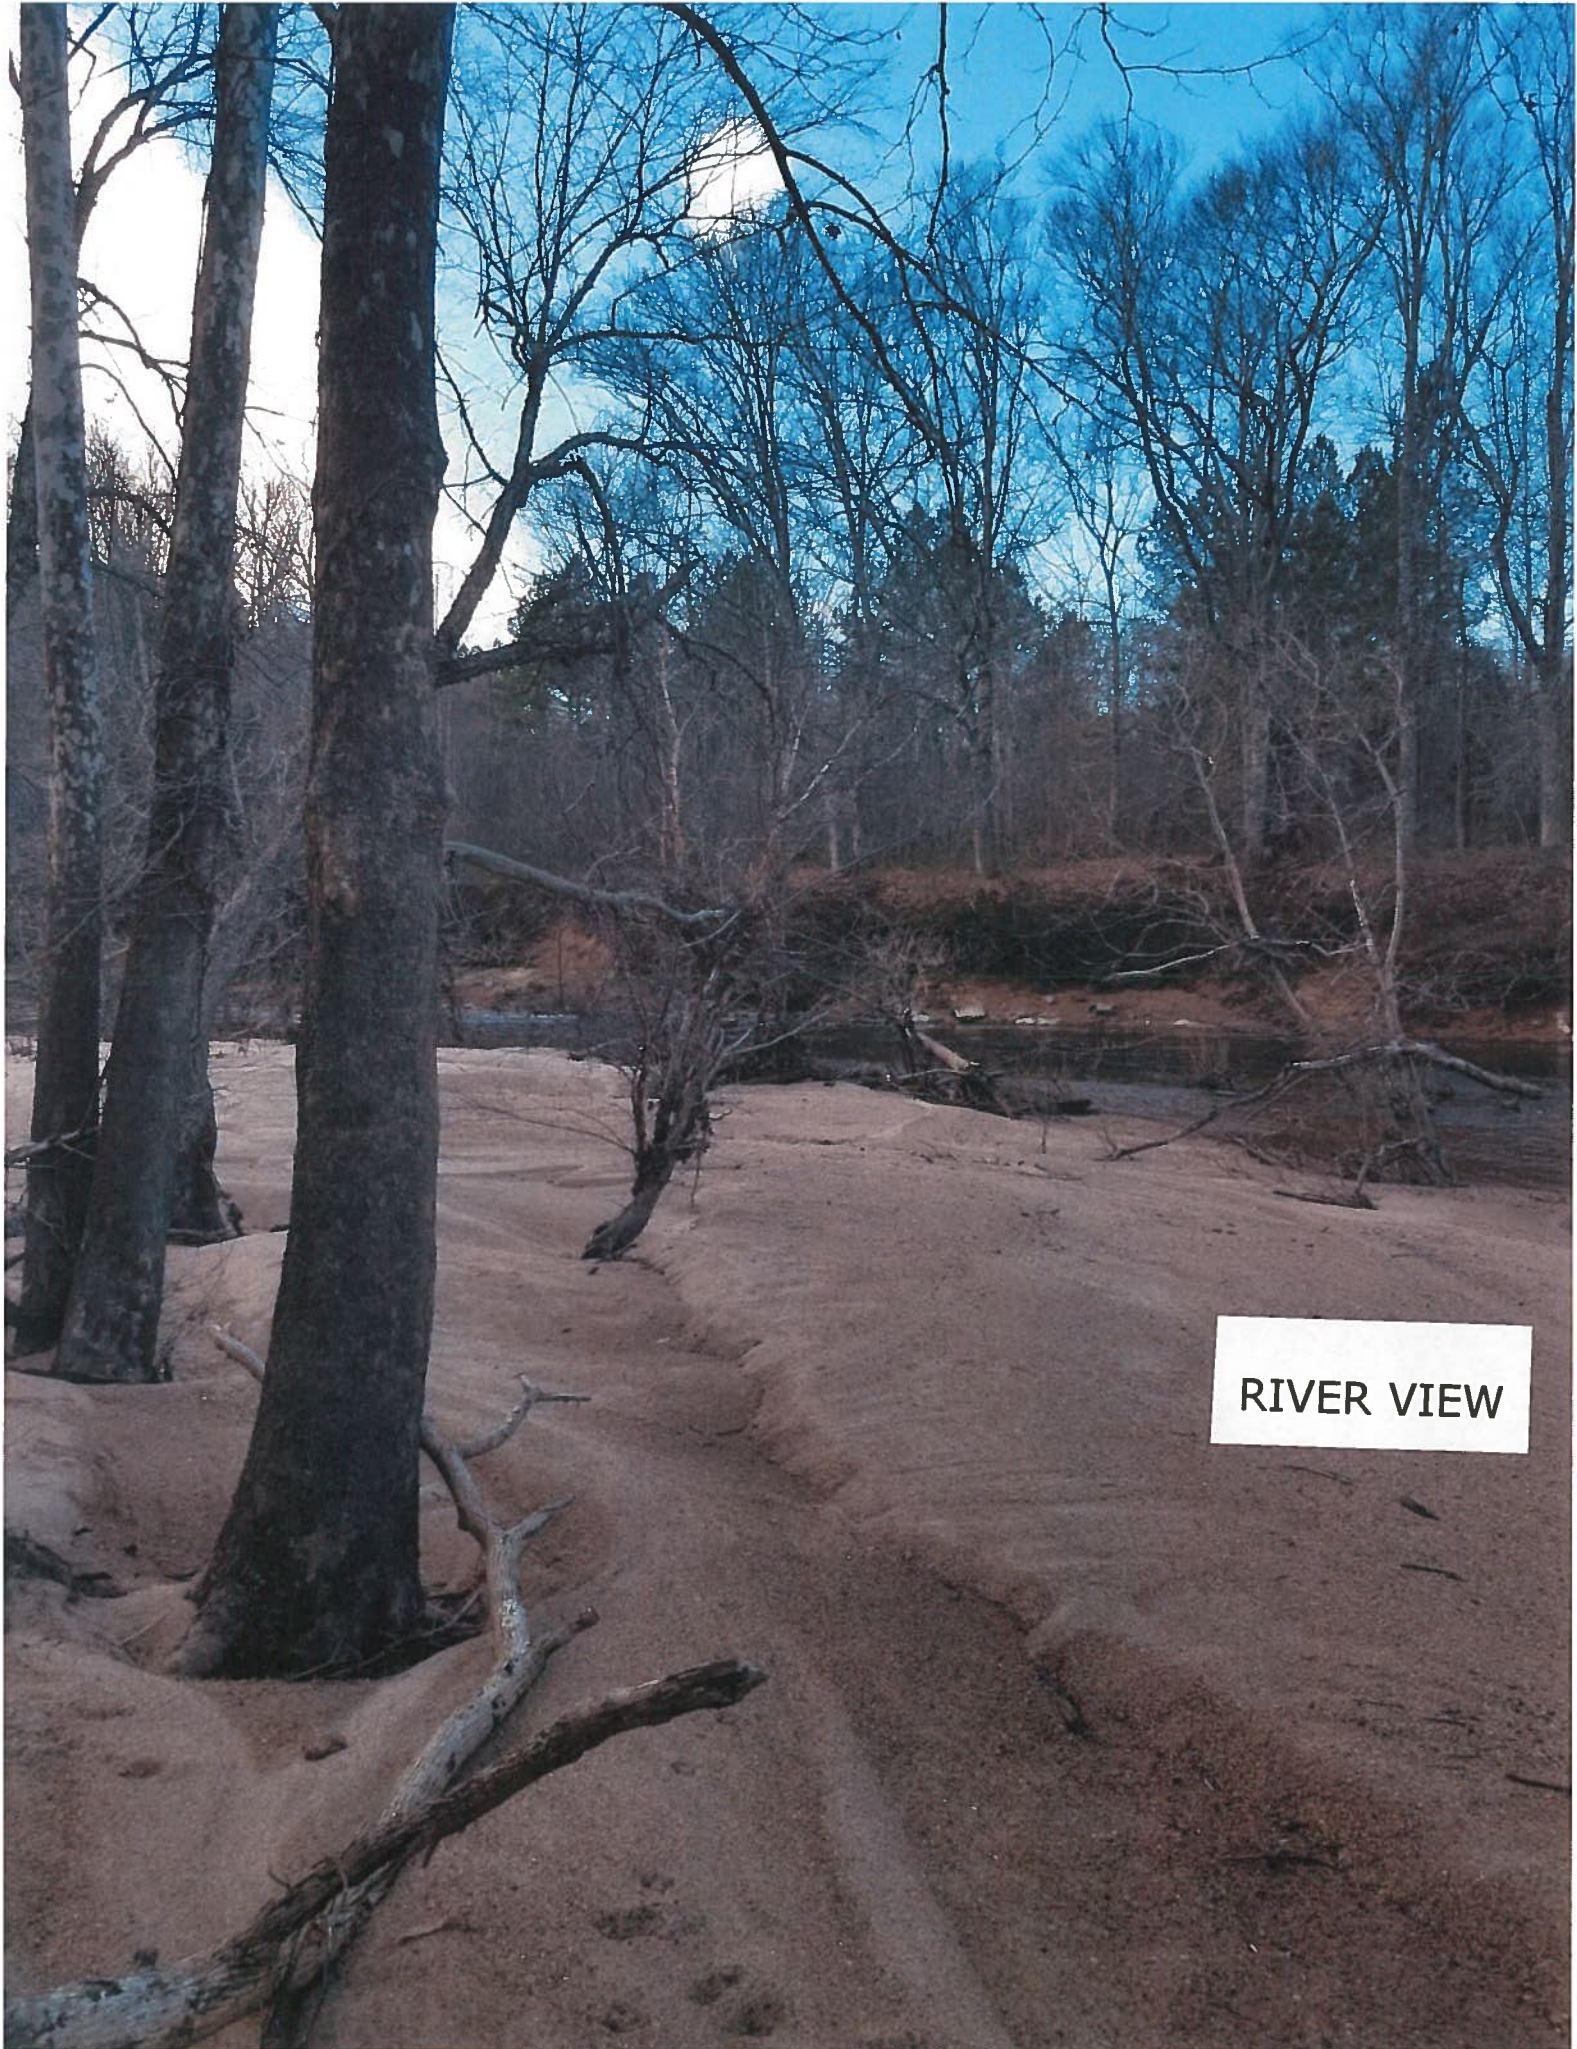

Respectfully,
Doug and Sharon Vickstrom
